

Quiz Bank

How do I share questions bank questions with other teachers?

Sharing and Managing Question banks

By default, teachers can manage only the questions in the context of the courses they are in. You can set up a role to allow teachers to share and manage questions on a larger scale.

You can also use this role to create a special system-wide "Question bank Manager" instead of giving admin level or site-wide Manager access to a person managing the Questions.

Moodle Administrators See:
